

ALUMINIUM BOATS 2019

About Us

Great manoeuvrability characteristics are provided by a lightweight body, ensuring that our boat is nimble and easy to handle, which will be appreciated by fishermen, boat rentals, rescue services and other common users. The hull of the ship is made from AL MG3 material with a thickness of 1,5 mm. Rear face, reinforcements and benches of 2 mm thickness.

Why our boats?

- ✓ The construction of our boat is a result of years of development.
- ✓ The stability is secured by the large surface of the bottom of the ship.
- ✓ The hull of the ship is made from AL MG3 material with a thickness of 1,5 mm.
- ✓ Details serves its own purpose and differentiates our boat from the competition.
